
Engine Swap

Posted by dix32233 - 2010/01/26 11:25

I have a 09 3.5 V6 Charger. I was interested in an engine swap to a 5.7 Hemi. Do you guys perform that? What would be the price range for a basic swap?

let me look into this. It can certainly be done. would require: motor, trans, ECU and complete wiring harness. You may want to look online for salvage yards that sell packages just for swaps like this.

How much horsepower could possibly be gained if I supercharge my 3.5 V6?

S/Cing would probably give about a 45-50% gain. I would Google the engine swap and see what comes up.
